

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Pete Tormey on June 29, 2009.

CANCELLED CLAIMS

Please **CANCEL** the following claims: 8, 16, 22.

AMENDED CLAIMS

Please amend the following claims: 1, 21, 23-25.

1. (Currently Amended) A method for customizing a structured markup language document and delivering said customized structured markup language document to an Internet appliance, comprising:

selecting a bookmark representing a structured markup language document from a list of bookmarks, wherein the bookmark in said list of bookmarks is associated with said internet appliance;

parsing information units in said structured markup language document after the selecting of the structured markup language document;

selecting one or more of said information units for delivery, said selecting

performed by a management server device;

determining the Internet appliance's geographical location from outside that internet appliance;

creating in a database a second structured markup language document including said one or more of said information units, said second structured markup language document customized according to capabilities of and for delivery to said Internet appliance, and said second structured markup language document associated in said database with a specified user;

delivering to said Internet appliance a menu for selection of at least said second structured markup language document, said menu including as a selection item at least a bookmark representing said second structured markup language document; and

including in said second structured markup language document information that is specific to the location of said Internet appliance.

21. (Currently Amended) A document customization system, comprising:

a management server offering a document customization service to a user;

a document manager associated with said management server for performing said document customization service to web pages identified by said user, said document customization service customizing said web pages according to capabilities of and for delivery to an internet appliance, said document customization

service operable to determine the internet appliance's geographical location from outside that internet appliance, operable to parse information units in structured markup language documents for said web pages, ~~capable of~~ enabling the user to select one or more of said information units for delivery to the user;

a database accessible by said document manager, said database storing customized web pages resulting from said document manager performing said document customization service, said database including a user record identifying a user; and

a portal for accessing said customized web pages in said database via bookmarks representing at least said customized web pages, wherein at least one of said bookmarks is associated with said internet appliance;

said portal is customized for access by an internet appliance; and
said document customization system operable to include ~~capable of including~~ in said customized web pages information that is specific to the location of said internet appliance.

23. (Currently Amended) A document customization system as in Claim [[22]] 21, wherein said internet appliance comprises a personal digital assistant.

24. (Currently Amended) A document customization system as in Claim [[22]] 21,

wherein said internet appliance comprises a mobile telephone.

25. (Currently Amended) A document customization system as in Claim ~~[[22]]~~ 21, wherein said internet appliance comprises a hand-held computer.

29. (Currently Amended) A document customization system as in Claim 21, wherein said database comprises:

~~a user record identifying a user;~~

a device record identifying an internet appliance;

a client record identifying a browser running on said internet appliance;

a user client record associating said user record with said client record;

and

a device profile record associating said user-client record with said device record.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BARBARA N. BURGESS whose telephone number is (571)272-3996. The examiner can normally be reached on M-F (8:00am-4:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
